YOUR RESEARCH, A LIFETIME OF OPPORTUNITY

The Ag Innovation Entrepreneurship Academy is designed for upper-division undergrads, graduate students, postdoctoral researchers and faculty working in food and agriculture-related fields.

The academy combines focused lectures, practical exercises, networking sessions and hands-on experiences in an innovative format to help you explore how your research can make a broader impact in industry, the marketplace and the world. You’ll learn to identify market needs and opportunities, develop a network of experts to support your venture—and create agriculture “food chain” clusters of innovation. We’ll help you move your research out of the lab and into the world.

APPLICATIONS NOW OPEN.
