Chapter 22. Standard Costs
On-line problems due 06/03

Chapter 23. Capital Budgeting
On-line problems due 06/10

FINAL EXAM June 13 (12:10 class – 6:00 pm, 4:40 class – 8:00 am)
Course Objective

This course is offered for students interested in developing analytical tools used in business decision-making. The concepts of costs are examined, measurement issues are considered, analytical techniques are explored, and budgeting and employee motivation issues investigated. Upon completing this class the successful student will have acquired an understanding of some fundamental approaches employed when evaluating managerial issues.

Performance Evaluation

Two exams and a final will be given in this class. Each midterm exam represents 20% of the course grade and the final exam represents 30%. Assigned homework problems are to be completed online by 11:55 pm on the due dates identified above. The combined homework grades will represent 20% of the final grade. Attendance at discussion sections will account for the remaining 10%. Exactly one absence will be allowed without penalty, and the lowest homework score will be dropped from your course score.

The course grade will be determined based on a curve. However, any student scoring 90% or above on the course is guaranteed an "A", and any student scoring 60% or below on the course will be in grave danger of failing.

Exam Policy

No make-up exams will be given. If there is a legitimate, verified & unexpected reason for missing Exam I, or II, that exam will be ignored and your final grade will be determined by the remaining exams and assignments which have been completed. The final exam must be taken to receive a passing grade.

All exams are closed book and will consist of multiple-choice questions. No student is allowed to provide or receive assistance from another student during an exam. You should bring a non-graphing calculator (if you bring any calculator that stores text or formulas you will not be allowed to use it during the exam), a Scantron Form 2000 (blue), and a No. 2 pencil to the test. Graded Scantrons will be returned in discussion section the week following the exam. Any questions regarding exam scores must be addressed with your TA within the week following the return of the graded Scantrons. Any student submitting a Scantron without a student ID number or Test Form identifier will receive zero credit for that exam.

(From UC Davis General Catalog) All grades except I and IP are final when filed by an instructor at the end of the quarter. No final grade except I may be revised by examination or the submission of additional work after the close of the quarter. If a clerical or procedural error in the reporting of a grade by the instructor can be documented, you may request a change of grade with a petition available from department offices.

If you have a learning disability and require extra time in taking an exam, you must obtain certification from the Learning Disabilities Center and provide your instructor with a copy of the certification prior to the first exam.

Class Web Page

The class web page is linked to your Smartsite webpage and can be accessed there. It is your responsibility throughout the quarter to audit the assignment, attendance and exam scores that are recorded for you. Contact your TA immediately if your scores are incorrect.
