

Building and Leading Great Teams

presented by
Jim Olson, MBA

Lecturer, former Executive-in-Residence | UC Davis Graduate School of Management

You will be introduced to the theory and practice of building, fixing, managing, and leading high-impact teams. You will gain a thorough understanding of the dynamics of team-based work settings and your effect on group performance. During the program, you will be assigned to teams (or can attend as a team) that will exist throughout the program and provide a context for experiencing and learning about the effects of group membership and leadership first hand. You will learn important team concepts and skills from team exercises in a safe, learning-rich environment. Lecture time is minimal. Learning by doing is emphasized.

Who Should Attend?

- Those who want to significantly improve their individual performance on their team, the team's performance, or their team leadership skills.
- Those who lack confidence diagnosing or solving team problems or effectively leading high-impact teams.
- Those who understand effective team basics but desire to improve team performance.

Learning Objectives and Program Benefits

- Learn to diagnose group dynamics and determine strategic team options as a manager.
- Understand how technological change affects team processes
- Learn practical interpersonal skills of implementing effective strategies for group situations.
- Gain valuable experience in team creation, problem diagnosis, and driving team effectiveness in a variety of contexts.

You will leave the workshop with the confidence and skills to optimize your own team performance, and to build and lead highly effective teams.
