Percentage International Students	35%
Percentage Women Students	23%
Average Program Tuition	\$101,044
Percentage Of Graduates working for Non-Profit	-
Percentage Of Graduates Class Entrepreneurs	8%

METHODOLOGY

The QS Global 250 Business Schools Report is based upon the findings of two global surveys – a survey of international employers who hire MBA graduates and a survey of academics with expertise in the fields of business and management. The results of these surveys are then used to inform a business school's placement in the QS Quadrants in Employability and Research Excellence. The full methodology maybe found in the QS Global 250 Business Schools report. (www.topmba.com)

The QS Intelligence Unit (QSIU) was formed in 2008. The team which also brings you the QS World University Rankings now numbers over 30 people from 15 countries.

QSIU has become a leading authority on performance evaluation, management and improvement in higher education and, perhaps, the foremost independent market intelligence compiler dedicated exclusively to international higher education.

As a private company, our work attracts particular scrutiny and since our business is entirely dependent on the continued good will of higher education institutions worldwide, we recognise that our reputation is vital. For details of our work, including detailed descriptions
